

Document Management, Records Management and Microfilm Conversion Solutions to be demonstrated by BMI at ARMA Las Vegas 2013

Microfilm conversion, document management, records management and workflow solutions for Government agencies and companies to be discussed by BMI Imaging Systems ARMA's 2013 Las Vegas, Nevada conference

Sacramento, California – July 30, 2013 - BMI Imaging Systems, a leading provider of [document management](#), records management, workflow and microfilm scanning solutions, announced today that it will be attending the Las Vegas, Nevada Association of Records Managers and Administrators (ARMA) 2013 conference.

ARMA International is a not-for-profit professional association and the authority on governing information as a strategic asset. ARMA's approximately 27,000+ members include information governance managers, information managers, librarians, archivists, document imaging specialists, legal professionals, IT managers, consultants, and educators, all of whom work in a wide variety of industries, including government, education, healthcare, financial services and energy.

BMI Imaging Systems will be demonstrating a variety of document and records management solutions that increase the efficiency of government and corporate record keeping processes. Electronic record filing solutions, document conversion, automated data acquisition and workflow solutions are just some of the custom applications BMI has provided for agencies and companies over the past 50 years.

In addition to its records management, document conversion and document management solutions, BMI will be demonstrating its unique [microfilm conversion solution](#), Digital ReelL. With customers nationwide, the Digital ReelL microfilm conversion solution is an affordable, practical solution well-suited for infrequently accessed records on microfilm and microfiche.

About BMI Imaging

BMI has been a leader in [records management](#), workflow, document management, document conversion and microfilm conversion services for over 50 years. BMI offers industry-leading document scanning products from Canon and e-ImageData (ScanPro 2000) and the ApplicationXtender document management product line from EMC Corporation. BMI has also developed the Digital ReelL microfilm conversion solution.

BMI Imaging serves government agencies and commercial companies throughout the United States and has developed a customer list of more than 2,000 accounts. BMI is headquartered just outside San Francisco in Sunnyvale, California, with an additional production and sales facility in Sacramento, California. www.bmiimaging.com.

About BMI's Digital Reel Microfilm Conversion Solution

Digital Reel is an affordable, practical microfilm and [microfiche conversion solution ideal for infrequently accessed legacy records](#). BMI will convert your microfilm to virtual, digital microfilm rolls at one of our secure facilities (on-site option is available). Digital Reel includes an online viewer that emulates microfilm retrieval from a reader printer. Users retrieve virtual microfilm rolls from a PC workstation, avoiding the hassles that come with physical microfilm and legacy reader printers. Digital Reel is available as an on-premise solution or as a cloud-based, hosted offering. Secure facilities, conversion accuracy, image quality and affordability make Digital Reel a unique microfilm conversion solution.
