

## **Document Management and Document Conversion Solutions to be highlighted by BMI Imaging at California Child Support Directors Association (CSDA) Conference**

*California child support service document management solution includes Canon scanners, EMC software and unique workflow that optimize child support case management processes between Counties and the State of California*

Sunnyvale, California – April 15, 2013 - BMI Imaging Systems, a leading provider of [California document management](#) and document scanning solutions, announced today that it will be demonstrating a unique solution for California Child Support Services Departments at the California CSDA Conference in May 2013.

Held in Orange County, California, CSDA's Conference will provide a means for the local child support directors of California's 58 counties to network and collaborate on the best ways to service local child support agencies with the common goal of providing medical and financial support to California citizens.

BMI will highlight a unique document management and document conversion solution that can help save staff time and make child support services department much more efficient in the way case records are handled. The document management solution can help reduce the inefficiencies of handling paper-based case records at an agency and facilitate electronic record delivery of relevant cases to the California child support enforcement (CSE) system.

### About BMI Imaging

BMI has been a leader in [California document scanning](#) and document management solutions for over 50 years. BMI offers industry-leading document scanning products from Canon and e-ImageData (ScanPro 2000) and the ApplicationXtender document management product line from EMC Corporation.
