

Texas Court Document Management and Microfilm Scanning Solutions to be highlighted by BMI at National Association of Court Management San Antonio, Texas Conference

Document management, case management, workflow and microfilm scanning solutions well-suited for Courts to be demonstrated by BMI Imaging Systems at the July 2013 National Association of Court Management (NACM) Conference in San Antonio, Texas

Sunnyvale, California – June 18, 2013 - BMI Imaging Systems, a leading provider of [court-based document management](#), case management and microfilm scanning solutions, announced today that it will be attending the San Antonio, Texas National Association of Court Management (NACM) conference in July of this year.

The National Association of Court Management has over 2,000 members from the United States, Canada, Australia and other countries. NACM is the largest organization of court management professionals in the world and provides court management professionals the opportunity to increase their proficiency while working with colleagues to improve the administration of justice.

BMI Imaging Systems will be demonstrating a variety of court management solutions that increase the efficiency of court operations. Electronic court record filing solutions, document conversion, automated data acquisition, case management and workflow solutions are just some of the [custom court applications](#) BMI has provided for courts and other justice system clients throughout the United States.

In addition to its document scanning and document management solutions, BMI will be demonstrating its unique [Texas microfilm scanning solution](#), Digital Reel. Available in Texas and nationwide, the Digital Reel microfilm scanning solution is ideal for infrequently accessed microfilm archives.

About BMI Imaging

BMI has been a leader in document management, document conversion and microfilm conversion services for over 50 years. BMI offers industry-leading document scanning products from Canon and e-ImageData (ScanPro 2000) and the ApplicationXtender document management product line from EMC Corporation. BMI has also developed the Digital Reel microfilm conversion solution. BMI Imaging serves government agencies and commercial companies throughout the United States and has developed a customer list of more than 2,000 accounts. BMI is headquartered just outside San

Francisco in Sunnyvale, California, with an additional production and sales facility in Sacramento, California. www.bmiimaging.com.

About BMI's Digital Reel Microfilm Conversion Solution

Digital Reel is a practical, affordable [Texas microfilm conversion solution](#) that is ideal for infrequently accessed archives. BMI will convert your microfilm (or microfiche) to virtual, digital microfilm rolls at one of our secure facilities. The microfilm conversion service creates a digital, virtual replica of your original microfilm or microfiche. The entire microfilm roll or microfiche is digitally converted, ensuring that no images are lost during the digital microfilm conversion process. The Digital Reel Texas microfilm conversion solution includes a web-based viewer that emulates microfilm retrieval from a reader printer. Users retrieve virtual microfilm rolls from a PC workstation, avoiding the hassles that come with physical microfilm and legacy reader printers.
