

Document Management Company, BMI Imaging Systems, Attends National Recorder Conference in Dallas, Texas

Document conversion, document management and workflow solutions were demonstrated at National Association of County Recorders, Election Officials and Clerks (NACRC) Annual Conference

Sunnyvale, California – August 27, 2013 - BMI Imaging Systems, Inc. (BMI), a leader in secure document scanning and [document management solutions](#), just recently returned from the National Association of County Recorders, Election Officials and Clerks (NACRC) Annual Conference in Dallas, Texas.

NACRC members convened for discussion on the latest document management issues affecting court administration, clerk to board, vital statistics, land records and records management. Members attended sessions on topics such as records preservation, marriage fraud, document management, document hosting technology and also participated in roundtable discussions on various topics.

The focus of the conference was to provide a venue for county officials to gain national knowledge to meet local needs. "This meeting gives county officials an opportunity to network on a national level, to share information and innovations, and take those document management related ideas back to implement in their individual counties and states," Brad Penfold, BMI's Vice President Sales, said.

NACRC is a professional organization founded in 1949 of elected and appointed county administration officials, who network on a national level to share information and ideas. The association provides continuing education, technology updates and a stronger voice on federal legislative issues and is an affiliate of NACo.
