

Microfilm and Microfiche Conversion Solution, Digital ReelL, Now Offered by New York Based Biel's Document Management

New York Microfilm scanning and Microfiche conversion solution creates digital replicas of microfilm rolls and microfiche; users retrieve digital records from online viewer, saving time and eliminating the need for physical reader printers

Sunnyvale, California – May 14, 2013 - BMI Imaging Systems, a leading provider of microfilm scanning and [microfiche conversion solutions](#), announced that New York-based Biel's Document Management is now offering the Digital ReelL microfilm and microfiche conversion solution.

Digital ReelL includes an online viewer with the microfilm conversion service. Dennis Kempner, Biel's Document Management President, explains, "As a New York-based document management solution company, we digitally convert hundreds of thousands of government and corporate records from various physical formats, including paper and microfilm. Digital ReelL is a proven, practical and affordable solution for our customers with legacy, infrequently accessed microfilm and microfiche records."

The Digital ReelL microfilm conversion service creates a digital replica of an organization's physical microfilm rolls or microfiche. The application viewer included with the microfilm conversion service emulates microfilm retrieval from a reader printer. Users simply retrieve virtual microfiche and microfilm rolls from a computer, avoiding the hassles that come with physical microfilm and legacy reader printers. Digital ReelL is available as an on premise solution or a cloud offering (the digital records are hosted from BMI's secure data center).

About BMI Imaging

Since 1958, BMI Imaging Systems has been a leader in document management, document conversion and microfilm scanning solutions. BMI offers industry-leading document management and document scanning products from companies like EMC, Canon and Kodak. In addition, BMI has developed the Digital ReelL microfilm and [New York microfiche scanning solution](#), which is available in New York and nationwide. BMI converts an average of 3 million images per month. BMI serves commercial and government agencies throughout the United States and has developed a customer list of more than 2,000 accounts. BMI is headquartered just outside San Francisco in Sunnyvale, California, with an additional production and sales facility in Sacramento, California. www.bmiimaging.com.
