

Microfilm Scanning and Document Conversion Solutions to be highlighted by BMI Imaging at Washington State Association of County Clerks Conference

Washington microfilm scanning and document conversion solutions to be exhibited by BMI Imaging at the June 2013 Washington State Association of County Clerks Conference

Sunnyvale, California – May 9, 2013 - BMI Imaging Systems, a nationwide leader of microfilm scanning and document management services, announced today that it will be demonstrating document management and microfilm conversion solutions for County Clerks at the Washington WSACC Conference in June 2013.

Held in Everett, Snohomish County, Washington, the WSACC Conference will help fulfill the Association's purpose to educate members regarding professional standards statutory and constitutional duties of the offices of the county clerks and district clerks.

In addition to its document scanning and document management solutions, BMI will be demonstrating its unique [Washington microfilm scanning solution](#), Digital ReelL. Available in Washington and nationwide, the Digital ReelL microfilm scanning solution is ideal for infrequently accessed microfilm archives. Thousands of clients nationwide are using Digital ReelL to eliminate the requirement to handle physical microfilm, microfiche and reader printers.

About BMI's Digital ReelL Microfilm Scanning Solution

Digital ReelL is a practical, affordable [Washington microfilm scanning solution](#) for infrequently accessed archives. BMI will convert your microfilm (or microfiche) to virtual, digital microfilm rolls at one of our secure facilities. The microfilm scanning service creates a digital, virtual replica of your original microfilm or microfiche. The entire microfilm roll or microfiche is digitally converted, ensuring that no images are lost during the digital microfilm conversion process.

The Digital ReelL Washington microfilm scanning solution includes a web-based viewer that emulates microfilm retrieval from a reader printer. Users retrieve virtual microfilm rolls from a PC workstation, avoiding the hassles that come with physical microfilm and legacy reader printers.

About BMI Imaging

BMI has been a leader in microfilm scanning and document management services for over 50 years. BMI offers industry-leading document scanning products from Canon and e-ImageData (ScanPro 2000) and the ApplicationXtender document management product line from EMC Corporation. BMI has developed the Digital ReelL microfilm scanning solution. BMI serves commercial and government agencies throughout the United States and has developed a customer list of more than 2,000 accounts. BMI is headquartered just outside San Francisco in Sunnyvale, California, with an additional production and sales facility in Sacramento, California. www.bmiimaging.com.
